

# DISCRETE MATHEMATICS

VOLUME 144, NUMBERS 1-3, 8 SEPTEMBER 1995

## CONTENTS

Preface	1
<i>Aigner, M., E. Triesch and Z. Tuza</i> Searching for acyclic orientations of graphs	3
<i>Erdős, P.L., U. Faigle and W. Kern</i> On the average rank of LYM-sets	11
<i>Felsner, S. and W.T. Trotter</i> Colorings of diagrams of interval orders and $\alpha$ -sequences of sets	23
<i>Griggs, J.R.</i> Matchings, cutsets, and chain partitions in graded posets	33
<i>Kierstead, H.A. and J. Qin</i> Coloring interval graphs with First-Fit	47
<i>Liu, W.-P., I. Rival and N. Zaguia</i> Automorphisms, Isotone self-maps and cycle-free orders	59
<i>Madej, T. and D.B. West</i> Interval number of special posets and random posets	67
<i>Mitas, J.</i> Interval orders based on arbitrary ordered sets	75
<i>Strahinger, S.</i> Dimensionality of ordinal structures	97
<i>Syslo, M.M.</i> The jump number problem on interval orders: A $3/2$ approximation algorithm	119
Author index to volume 144	131
